

SCHOOL RESOURCE OFFICER REPORT

As the weather begins to warm up, and spring gets a little closer, you will notice the sun rising a little earlier as you come to school in the morning. Please be observant of School Security Officers as they direct vehicle traffic each morning. We have had several “close calls” from students and parents driving blind into the sun with a dirty windshield. If you can’t see them, please slow down & clean your windshield to avoid hitting a pedestrian. The same goes for slowing or stopped traffic. **Please be kind to one another** while in the parent drop off loop, pick a lane and stay in it. Be courteous to one another as well, parents and security have reported several road rage incidents. We need to set good examples for our children.

*****Also as the weather gets warmer and temperatures rise, burglaries rise as well. Keep your car doors locked and valuables out of sight. Late at night thieves may be on the prowl and in your neighborhood. We take many reports regarding theft from vehicles around this time, don’t be a statistic.*****

Parents:

Let your children know, a trend that School Administrators intend to deter is, if they decide to record any physical fights on their smart phones, and upload that video to social media or even send it electronically to others, they will be suspended.

Some of the latest trend in the schools include fights and harassment. Drug use on campus has also gone up. You have every right to go through your child’s room to ensure they are not using. Some of the keys to determining if your child is smoking marijuana is finding lighters, over-the-counter eye drops for redness, bedrooms with a high concentration of Axe spray or other cheap cologne smell, with windows open. Unmarked, Carmex-type containers with brown waxy substances are not lip gloss; It’s sap-like and either smoked or put in e-cigarettes. Wax marijuana has a very high concentration of THC, the active ingredient in marijuana, and can lead to overdose in some cases. Mushrooms (‘shrooms), a form of Psilocybin is also on the rise. It causes hallucinations, and students who we find are using, seem to be very lethargic and “out of it.”

And if students are aware of someone “dealing” in the schools, they can always anonymously report it to a counselor, any security officer or administrator.

TO END IT IN THE SCHOOLS, WE NEED THEM TO REPORT IT!

Please do not hesitate to contact us if you have any questions or concerns.
